

Successful projects are built on strong relationships.
Just ask our Smart customers.

“ Kainos Smart has been extremely helpful with our first Workday Update. They accompanied us through the 5 week window, with dedication to customer satisfaction and success ever present.

Smart really helps us to focus on validation rather than execution for testing updates, new functionality and extending Workday.

Nicolas Pastor

Principal Consultant - Desjardins

“ If you want to increase your testing footprint without increasing resources, Kainos Smart is a good way of doing it.

Being a financial and benefits company, security is extremely important to us - Smart is extremely valuable for demonstrating that controls are not only in place, but intact - it's delivered a lot of value for us.

Sara Phillip

Director, Global HRMS Delivery - Sun Life Financial

More Financial Services Organizations

that count on Smart every week to boost their Workday testing, free up key staff, and reduce risk
