kainos® smart audit

REDUCE THE COST AND EFFORT OF CREATING AND MAINTAINING SECURITY CONTROLS BY UP TO 70%

With the Workday preferred audit solution

Simplify security without the effort and expense

Even for small organisations, creating, implementing, and maintaining effective controls is a significant overhead. Coupled with the weeks of preparation audits demand, that's substantial expense, time, and effort that automation can reduce by up to 70%.

Embrace change easily and securely in Workday

Changes to Workday, your business, workforce, and regulatory obligations require constant monitoring to avoid the risk of fraud, breach, or errors in your financial reporting. This usually requires teams to track issues and gather evidence manually. Smart Audit automates these critical security tasks with 150+ SOC-Certified controls so Workday is compliant and audit-ready.

Automation with impact

These four key control areas can take organisations up to 500+ hours to set-up, maintain and monitor in Workday annually. With Smart Audit, your business can refocus that time and expertise elsewhere.

Reduce Segregation of Duties review effort by up to 80%
Automate visibility and oversight of SOD conflicts for rapid resolution.

Reduce User Access Review effort by up to 30%
Ensure user access is appropriate with AI-driven anomaly detection.

Reduce User Activity Monitoring effort by up to 50%
Real-time monitoring and alerting to indicate abuse of access.

Reduce the effort of detecting configuration change by 25%
Protection from harmful, unauthorised configuration changes.

OU Health

"Smart Audit is a lifesaver. It cut our regular control checks from five days a month to half a day. Without it, we'd have major problems."
